DESIGNS

Emberwing

A dragon guarding its tower. The jaw opens. So does the treasure chest.

152 pieces | About 6 to 8 h | Ages 14+

No glue needed | 21 steps

Before you start

Push parts out from the back of the sheet. Do not twist them out.

Every part has a code. B12 is part 12 on sheet B. Codes for show faces are printed next to the part.

Press tabs straight in, firm but gentle. No glue needed.

Too tight? Rub the tab on the sandpaper two or three times, then try again.

Rub wax into every hole that turns. It makes moving parts smooth.

A check mark means: test it now, before you close it up.

Small parts. Not for children under 14. Keep spare parts until you finish.

What's in the box

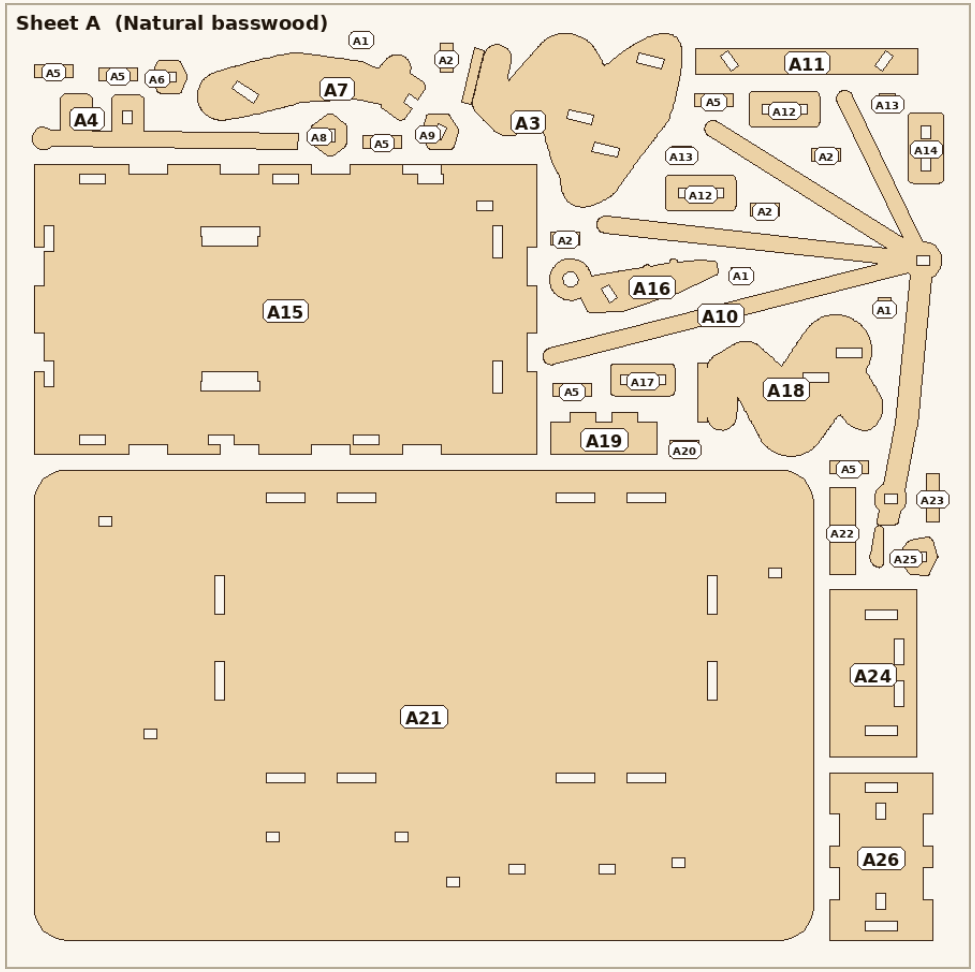

Sheet A: Natural basswood, 38 parts
Sheet B: Natural basswood, 61 parts + 4 spares
Sheet C: Natural basswood, 24 parts + 2 spares
Sheet D: Red, 5 parts
Sheet E: Natural basswood, 4 parts
Sheet F: Gold, 17 parts
Sheet G: Purple, 2 parts
Sheet H: Green, 1 parts

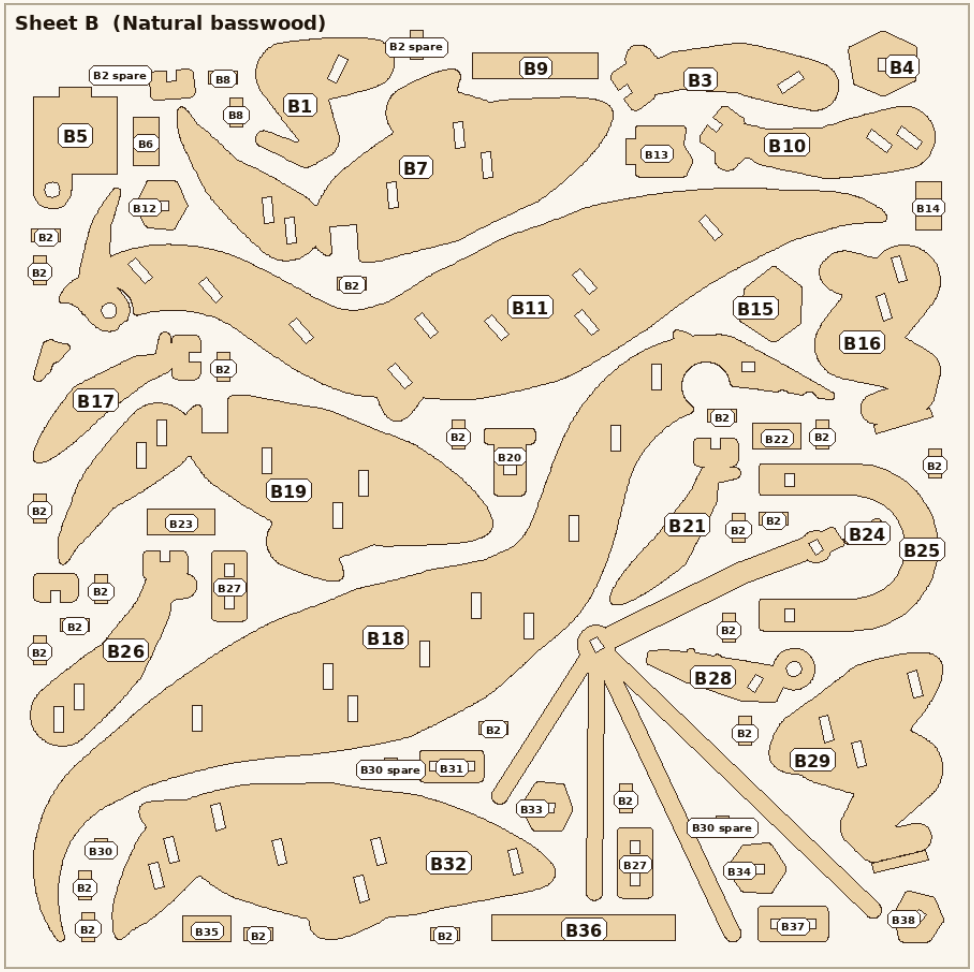

1 x 3/16 in birch dowel, 21 mm (jaw)
1 x 3/16 in birch dowel, 56 mm (chest hinge)
1 x sandpaper 240 grit

Build it in 3D on your phone: scan this code. Turn the model, tap any part, and watch it slide into place.

1 Start the dragon: centre slice and keys

See it in 3D

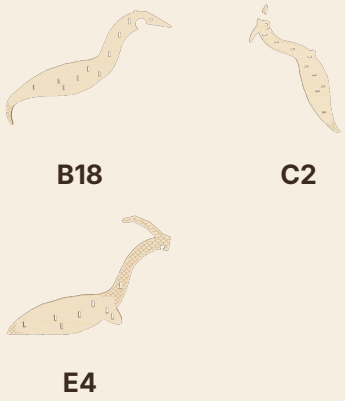

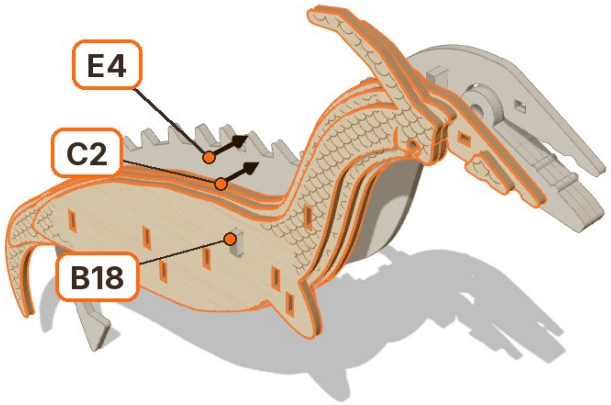

The red centre slice carries the spikes. Push every key halfway through it.

2 Right side: slices 2 to 4 from the centre

See it in 3D

Slide each slice onto the keys. Match the outline to the slice below.

3 Right side: slices 5 to 7 from the centre

See it in 3D

G1 x2

x2

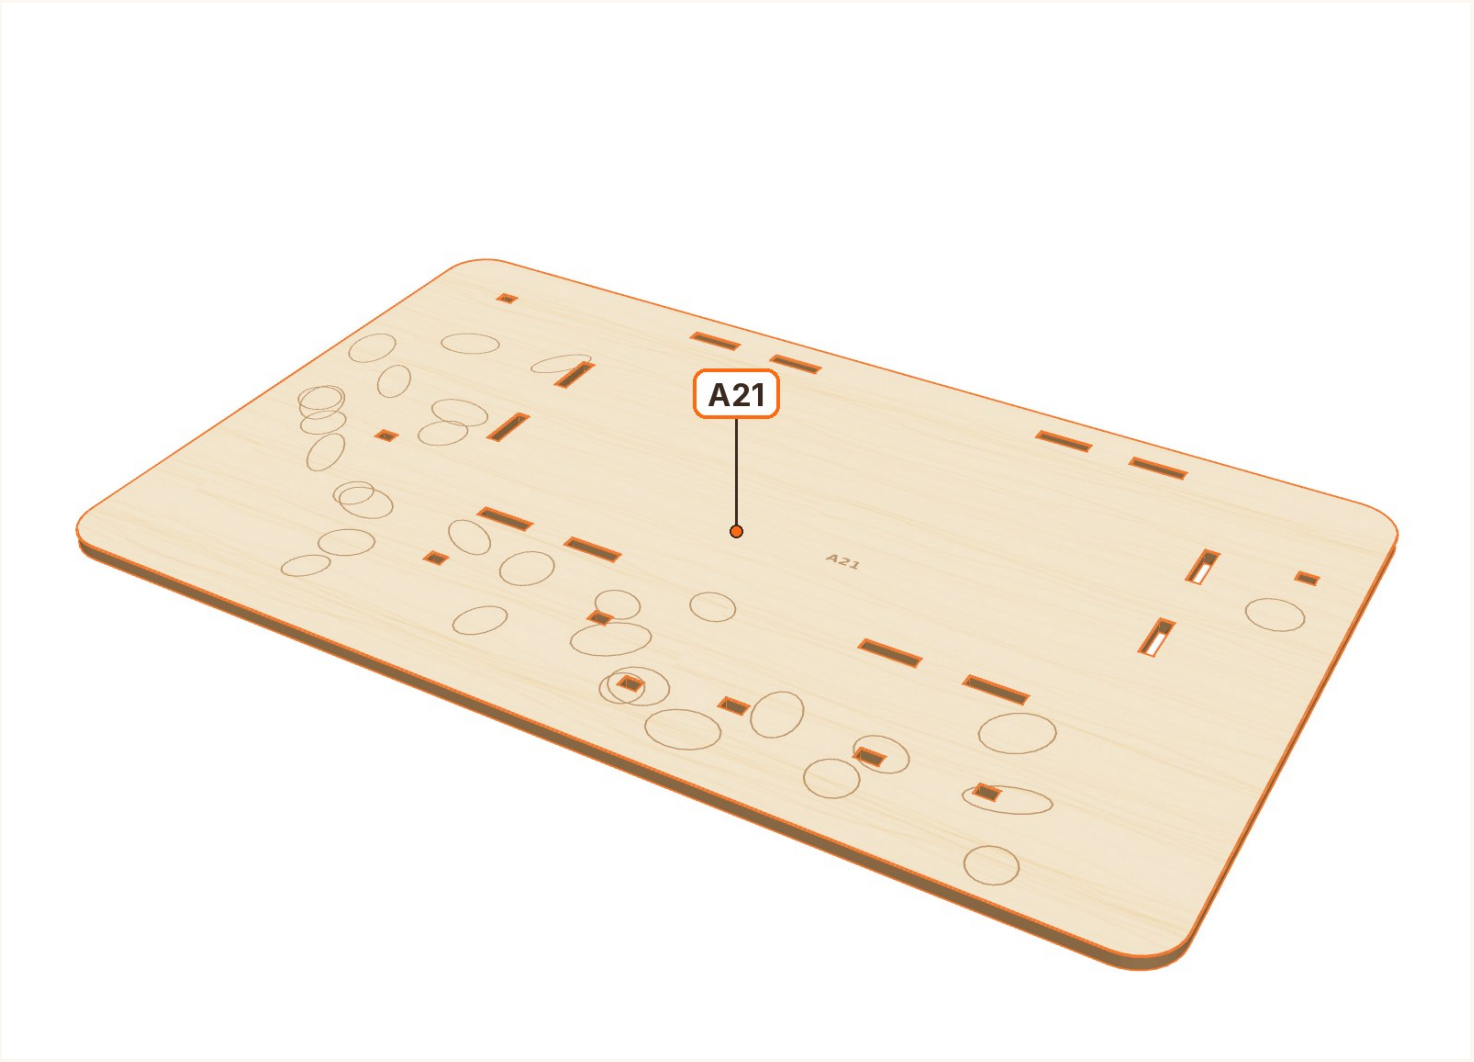

Slide each purple wing forward through the shoulder bar. Then add the bones and the gold thumb claw with their pegs.

10 Lay the ground plate

See it in 3D

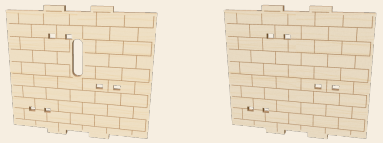

A21

This is the rocky ground under the tower.

11 Build the tower walls

See it in 3D

C1

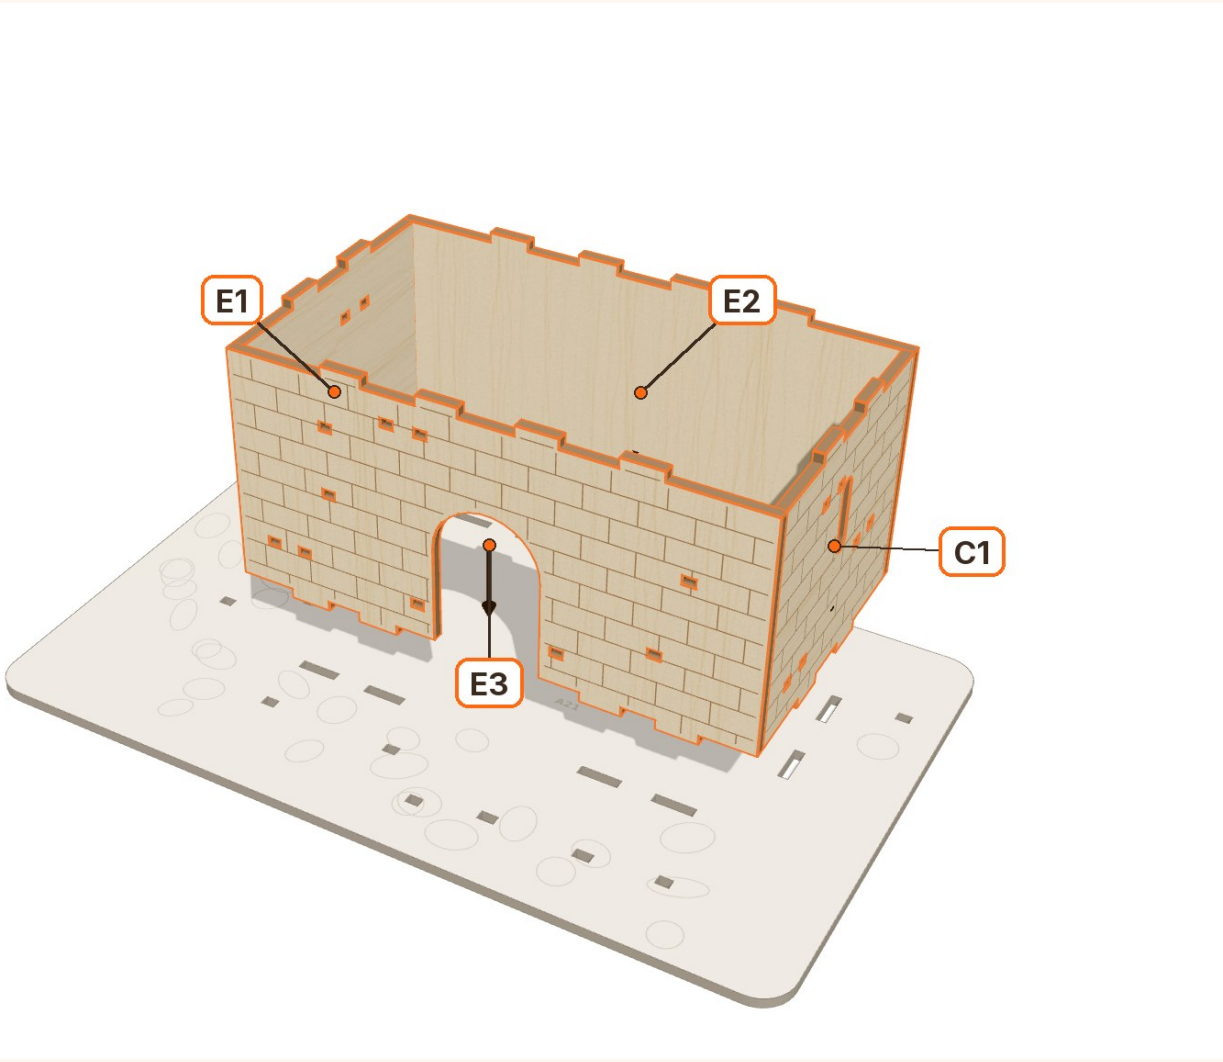

E1

E2

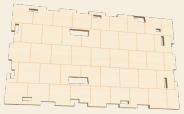

E3

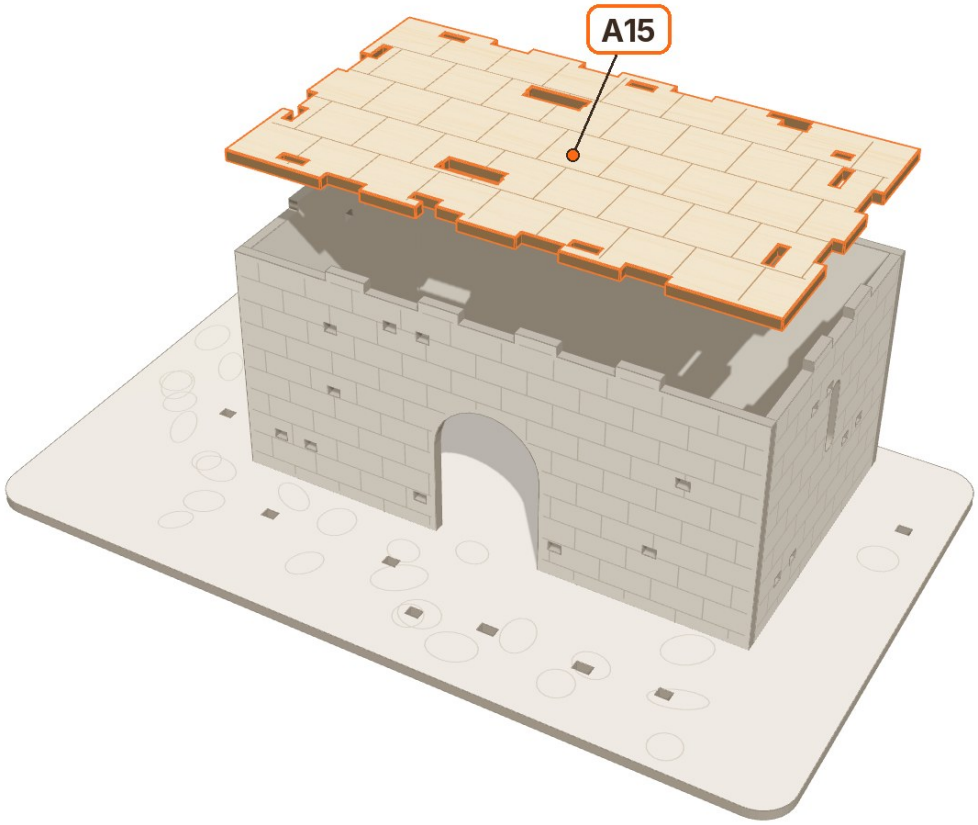

Front and back first, then the sides.

12 Put the top on the tower

See it in 3D

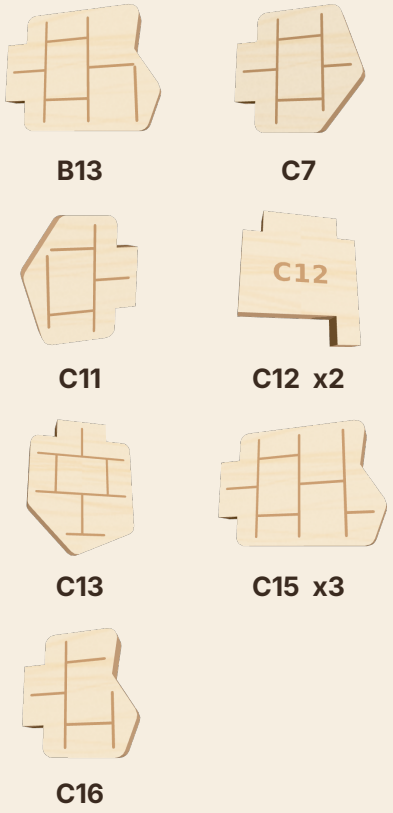

A15

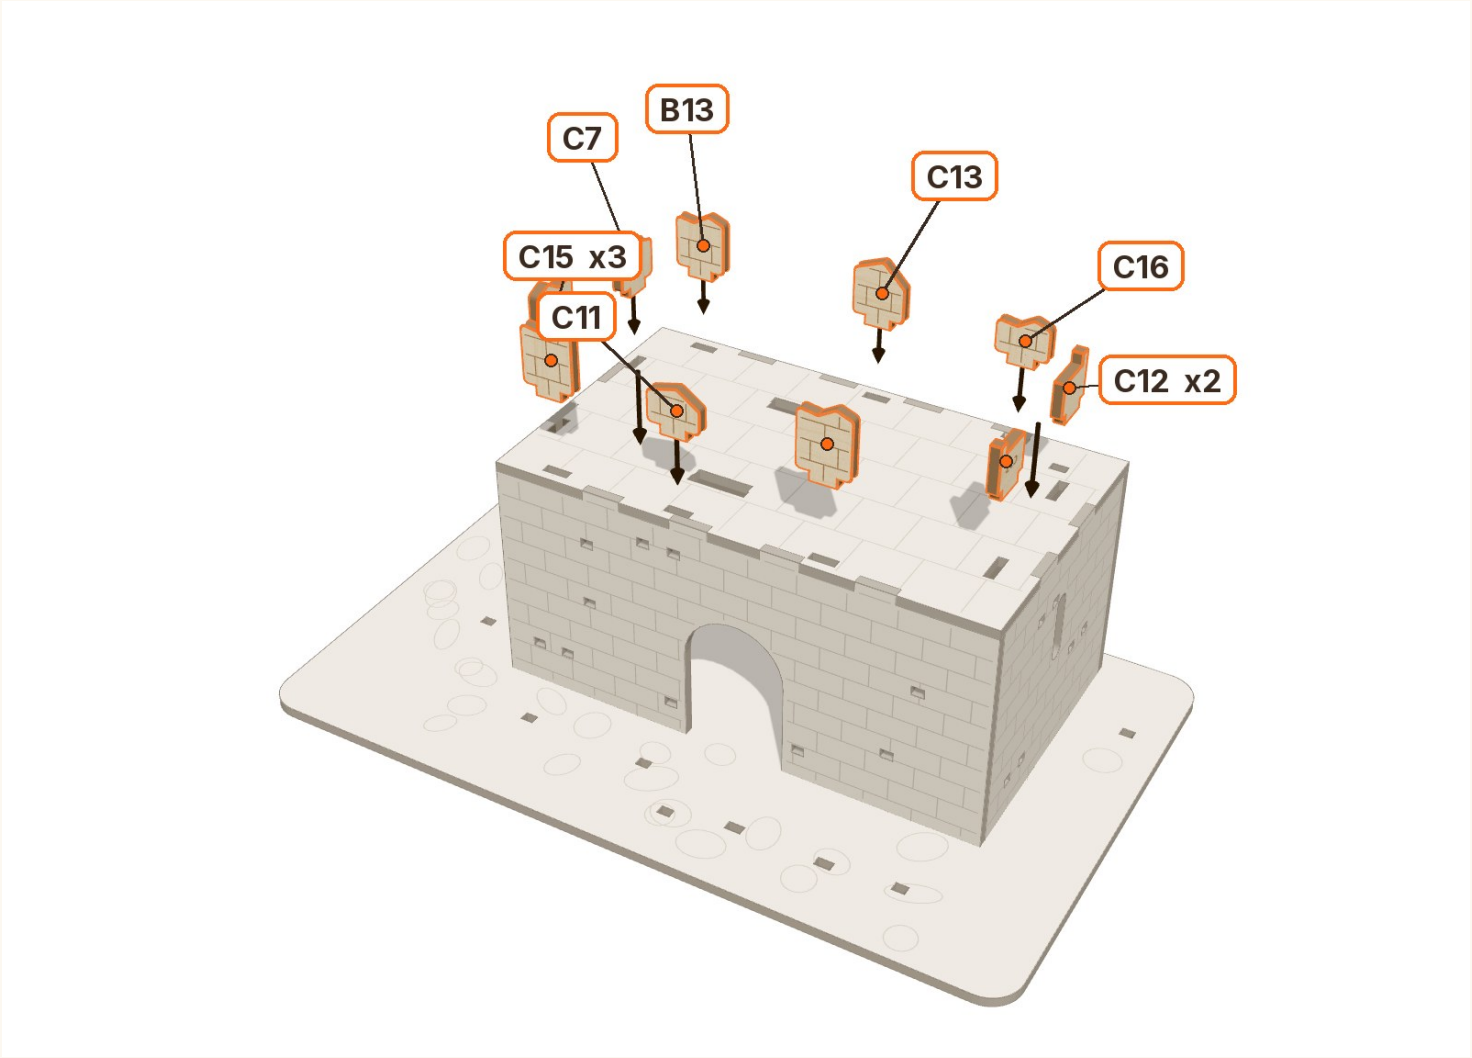

Tabs from all four walls lock it in.

13 Stand the battlements

See it in 3D

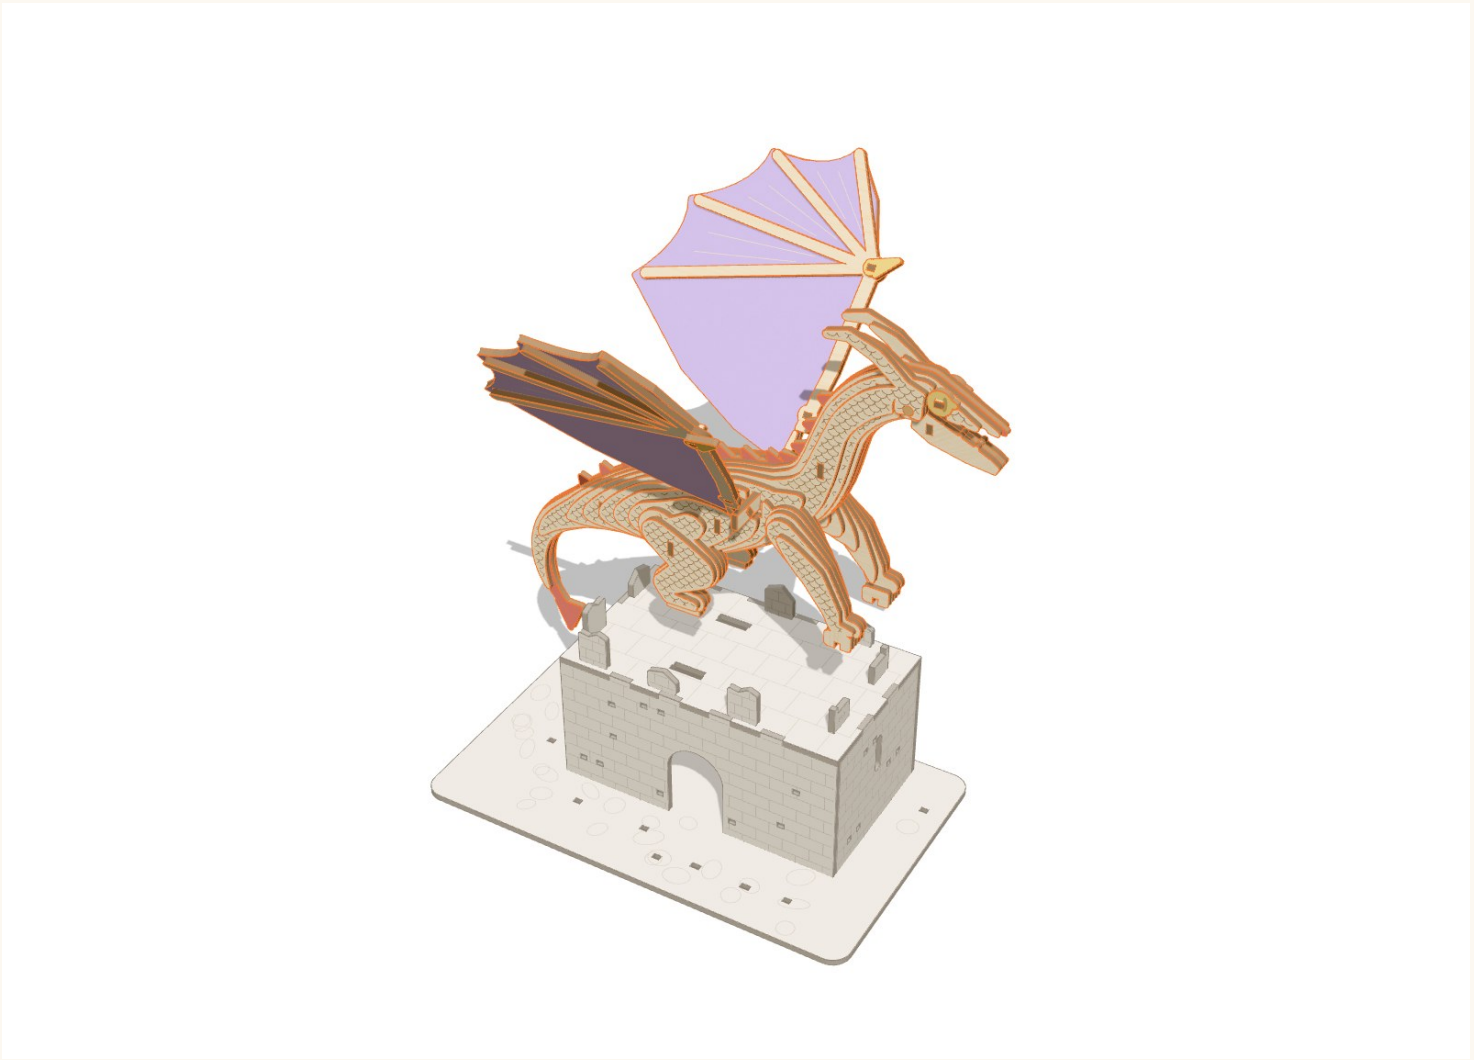

Broken ones are on purpose: this tower is a ruin.

14 Set Emberwing on her tower

See it in 3D

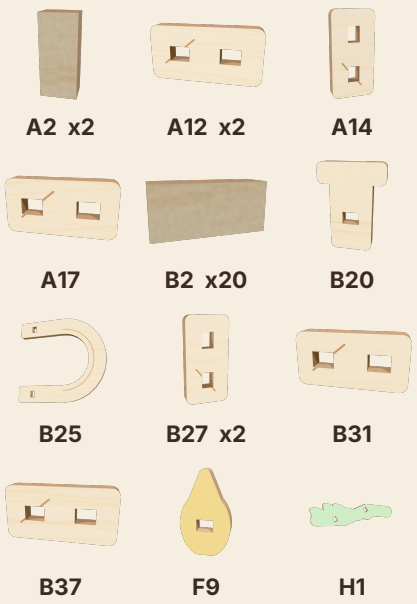

No new parts in this step.

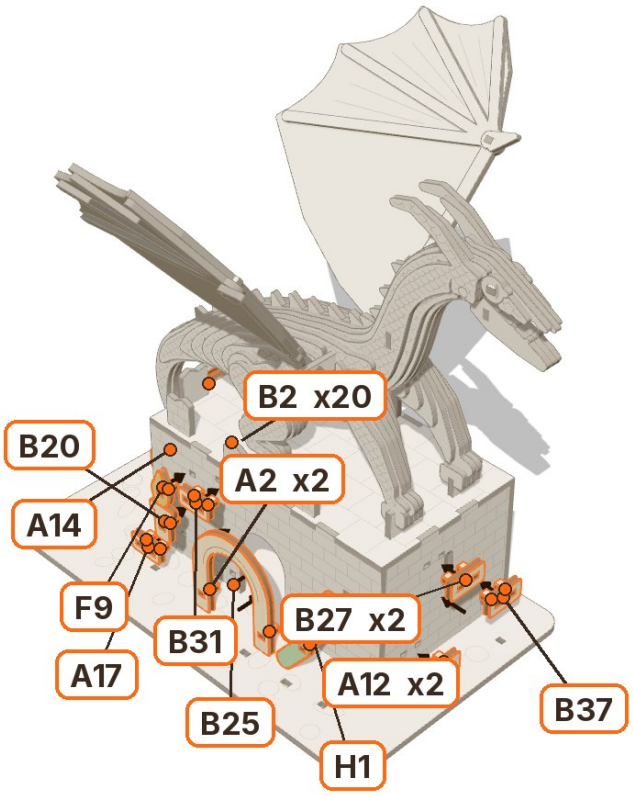

Hind feet tabs go into the top. Front claws slide down over the two front stones.

15 Add the door, the ivy and the torch

See it in 3D

Little square pegs hold each piece.

16 Scatter the fallen stones

Gold bands go on last.

19 Hinge the lid

See it in 3D

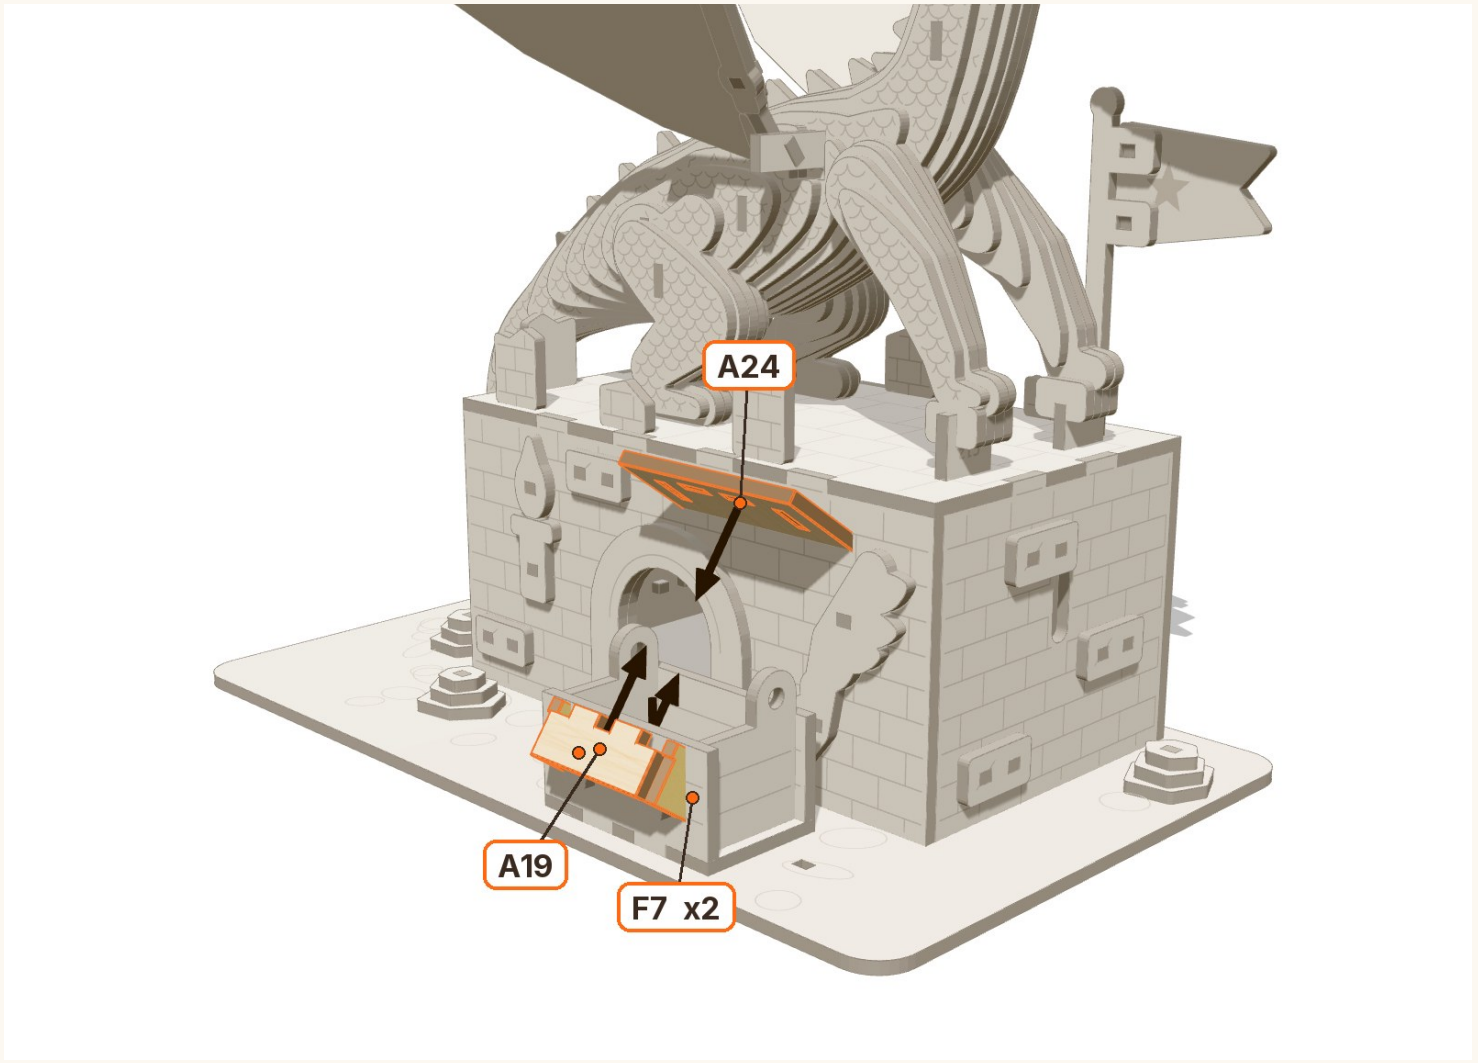

A19

A24

F7 x2

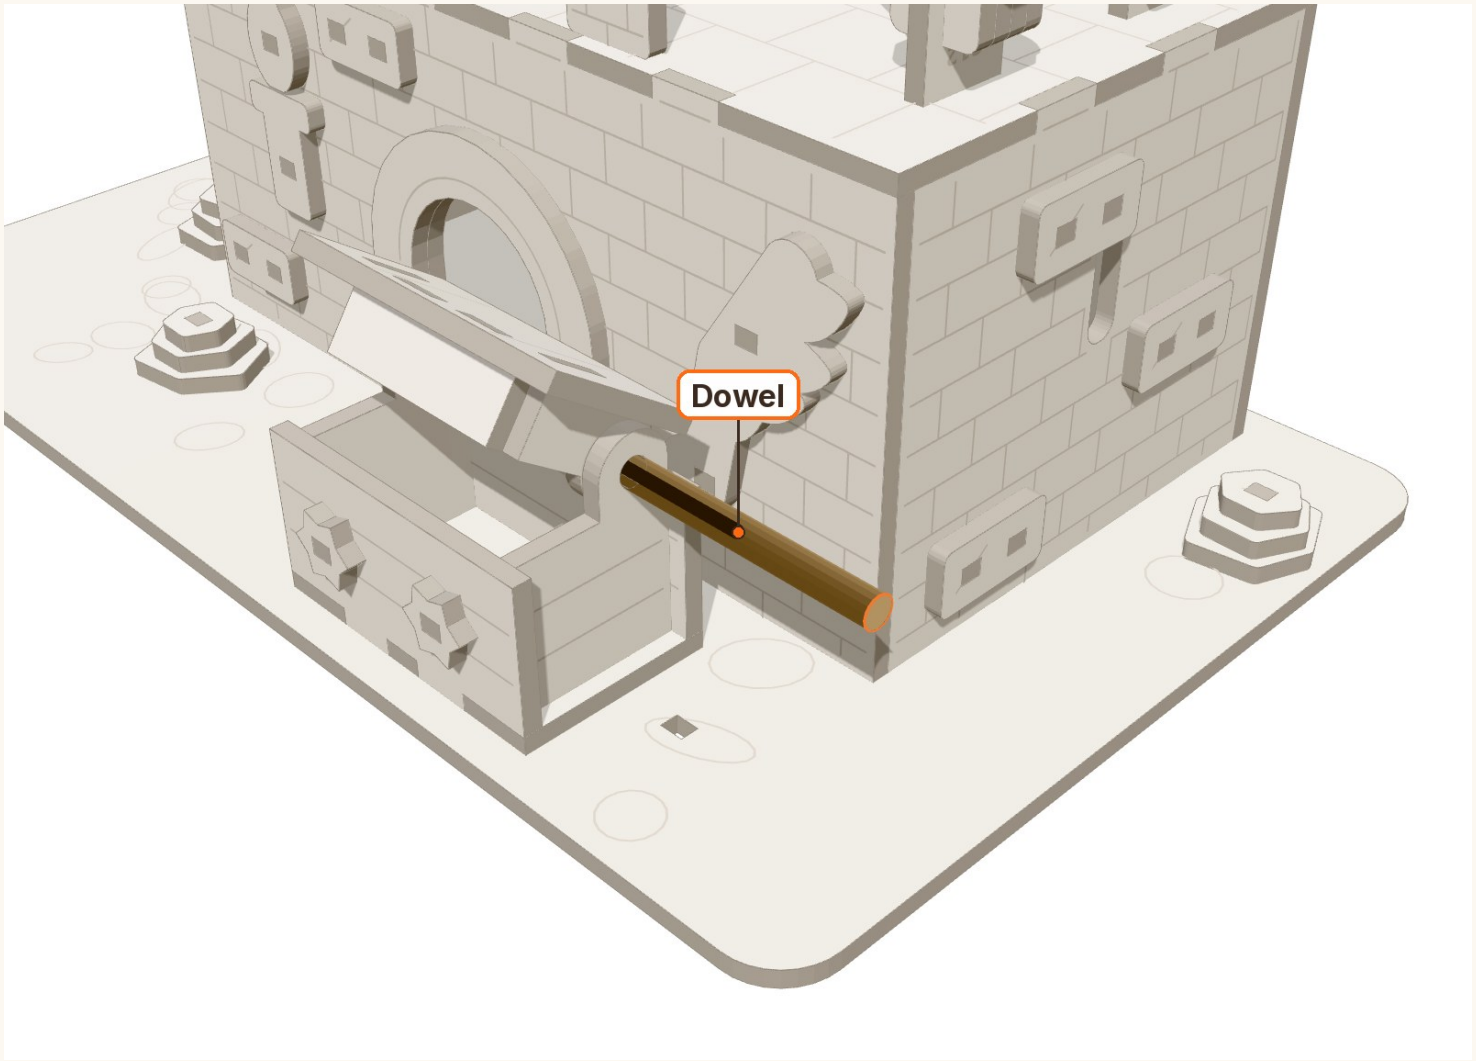

Push the long dowel through both sides. The lid should swing open.

TEST IT NOW
Open and close the lid. It should not rub the walls.

20 Push the hinge dowel through

See it in 3D

Dowel 46 mm

Wax it first. Then try the lid.

TEST IT NOW
Open and close the lid. It should not rub the walls.

21 Pile up the gold

F6 x3

F8 x3

Stack the coins on the little pegs.

You built it!

Dust it with a soft dry brush. Keep it out of hot sun and damp rooms.

If a part works loose, press it back in. A tiny drop of wood glue is fine for repairs.

Missing or broken part? Send us the code from the parts map and we will mail a new one.
