Blossom Waltz

A flower music box that turns while it plays.

156 pieces | About 4 to 5 h | Ages 14+ | No glue needed | 25 steps

Before you start

Push parts out from the back of the sheet. Do not twist them out.

Every part has a code. B12 is part 12 on sheet B. Codes for show faces are printed next to the part.

Press tabs straight in, firm but gentle. No glue needed.

Too tight? Rub the tab on the sandpaper two or three times, then try again.

Rub wax into every hole that turns. It makes moving parts smooth.

A check mark means: test it now, before you close it up.

Small parts. Not for children under 14. Keep spare parts until you finish.

What's in the box

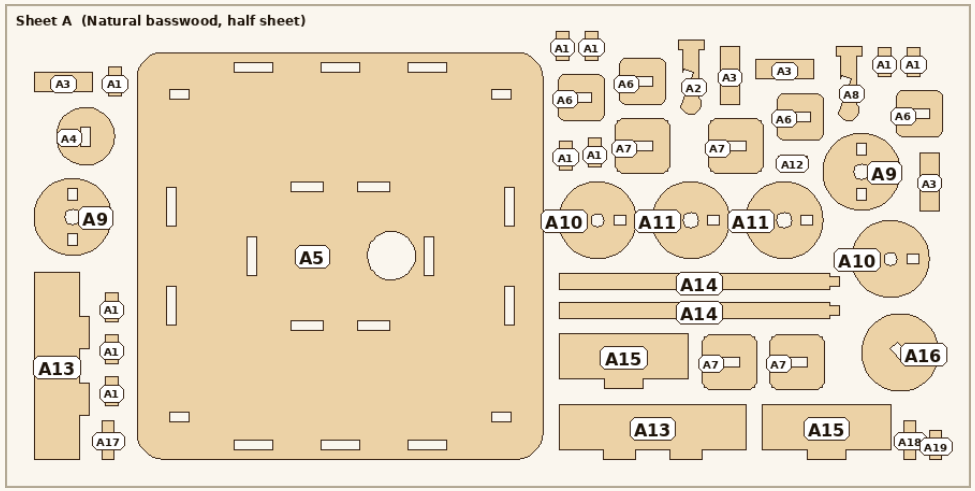

Sheet A: Natural basswood, 43 parts
Sheet B: White, 30 parts
Sheet C: White, 14 parts
Sheet D: Pink, 18 parts
Sheet E: Green, 19 parts
Sheet F: Yellow, 7 parts
Sheet G: Haze Blue, 10 parts
Sheet H: Purple, 15 parts

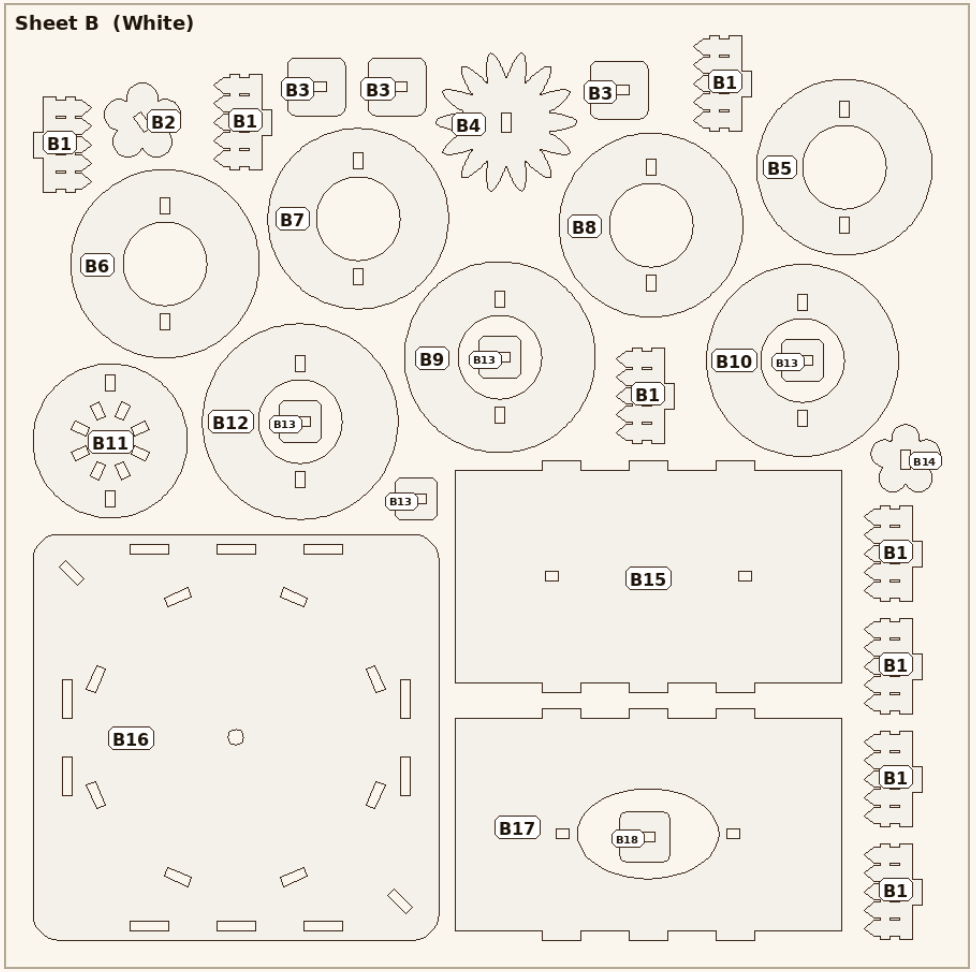

1 x 18-note wind-up music movement with rotating shaft
1 x 3/16 in birch dowel, 55 mm
1 x wax stick
1 x sandpaper 240 grit

Build it in 3D on your phone: scan this code. Turn the model, tap any part, and watch it slide into place.

1 Build the four feet

See it in 3D

A3 x4 · A6 x4 · A7 x4 · B3 x3 · B13 x4 · B18 · C1 x3 · C6

x4

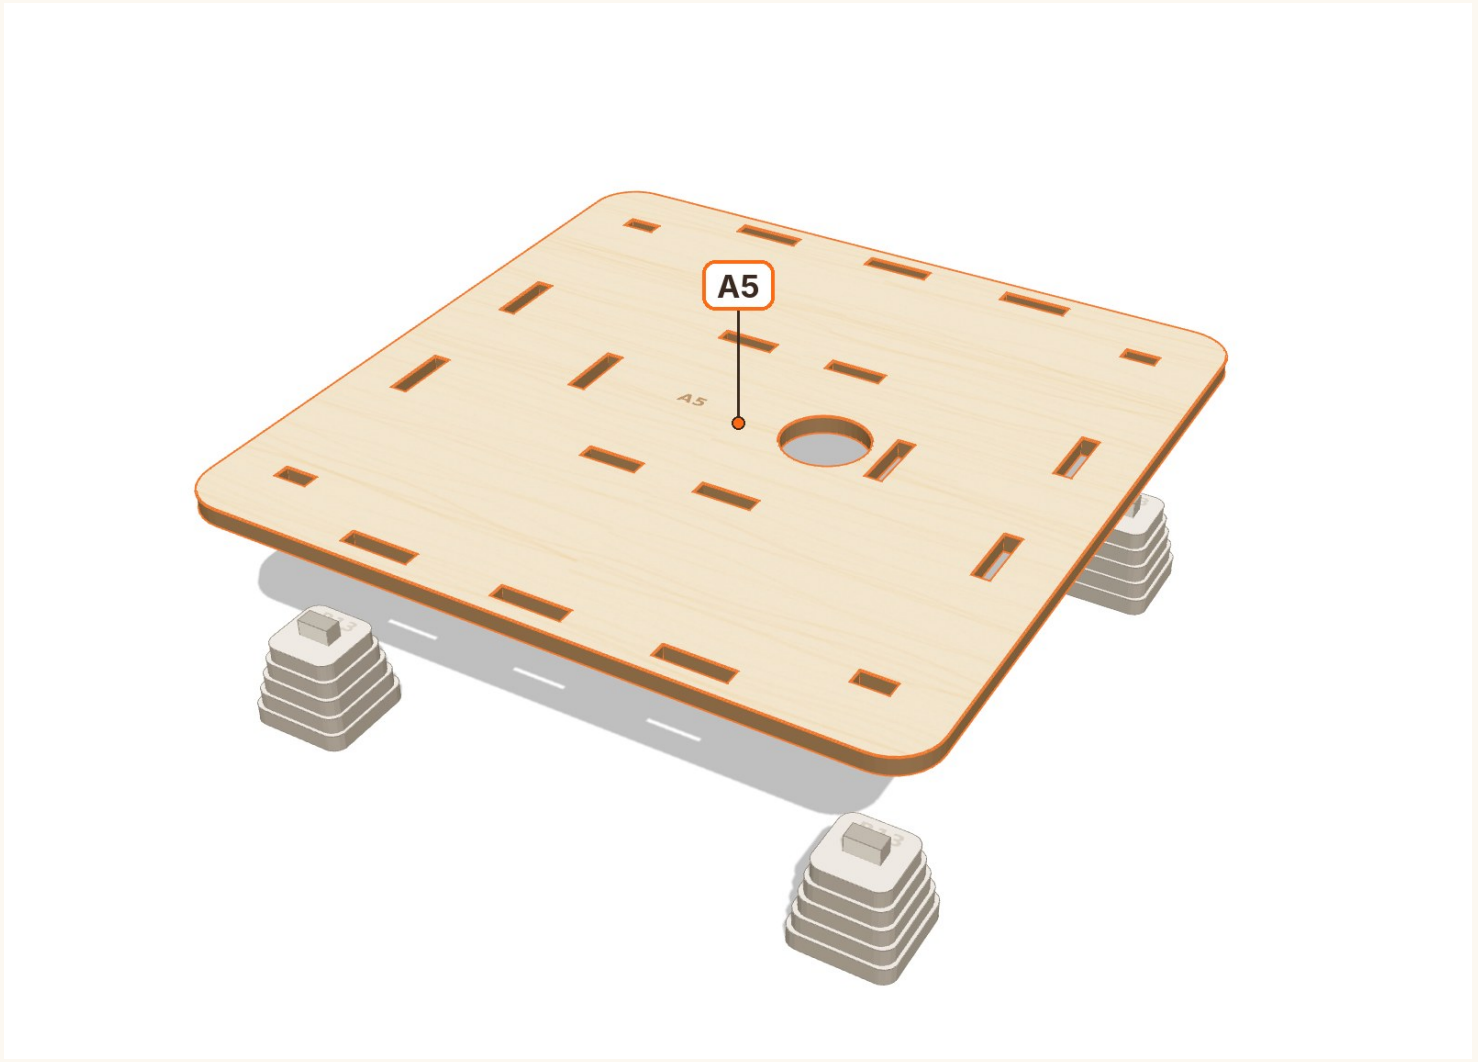

Push each peg into the bottom square first, then stack the rest.

2 Add the base plate

See it in 3D

A5

The round hole is for the winding key.

3 Build the movement cradle

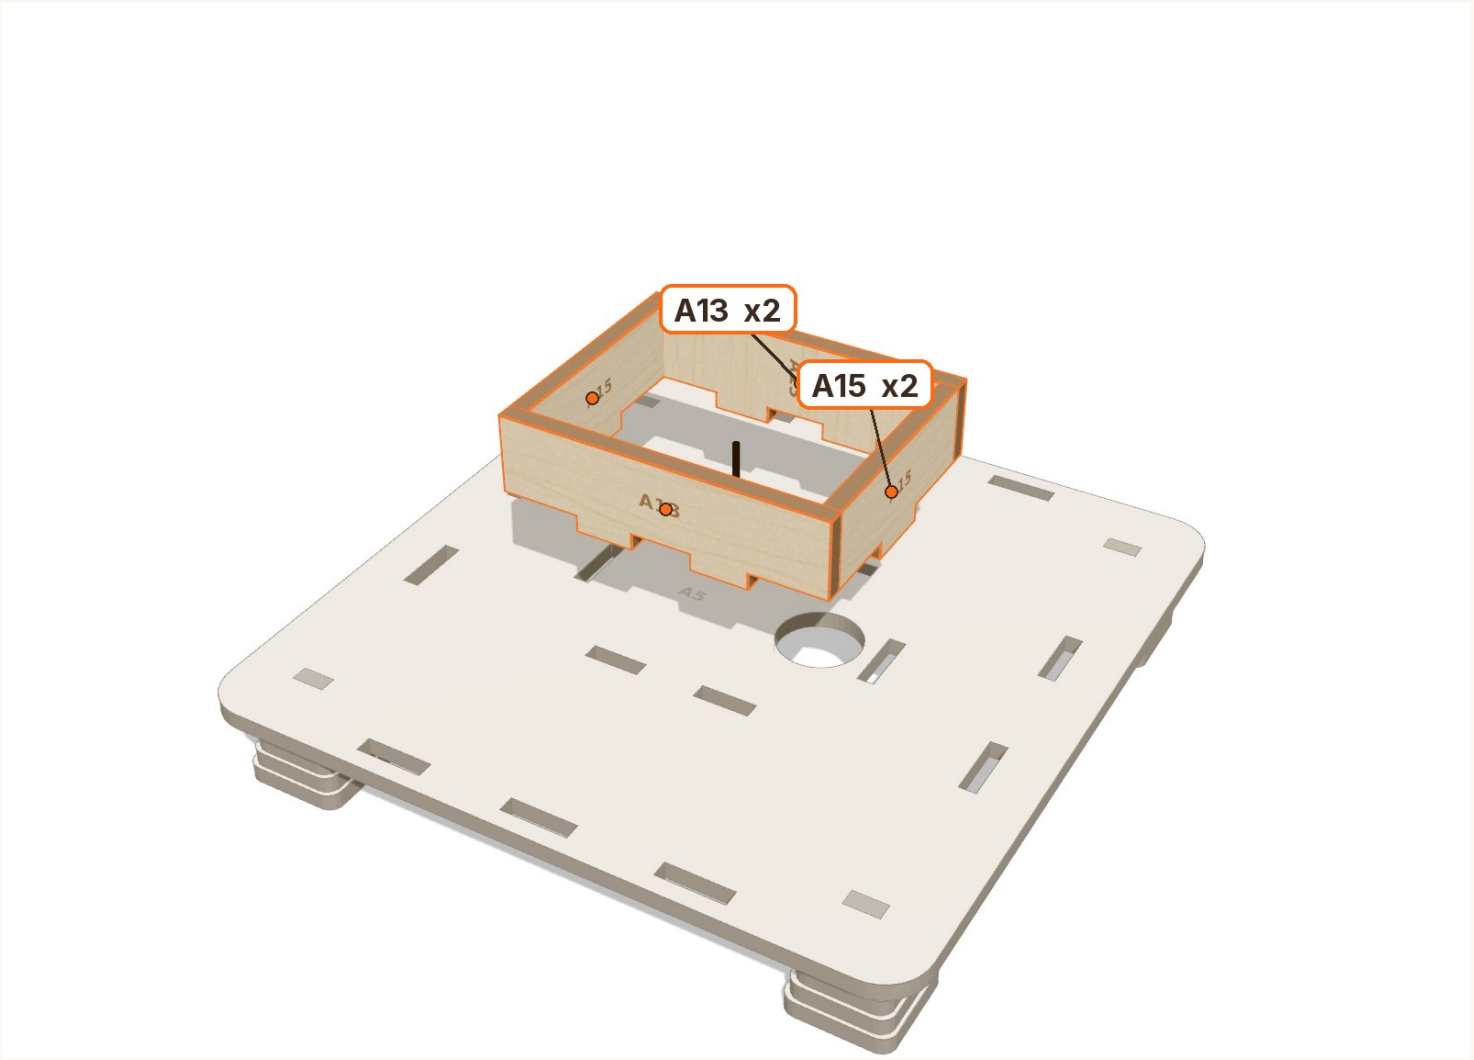

See it in 3D

A13 x2

A15 x2

Four low walls hold the music movement.

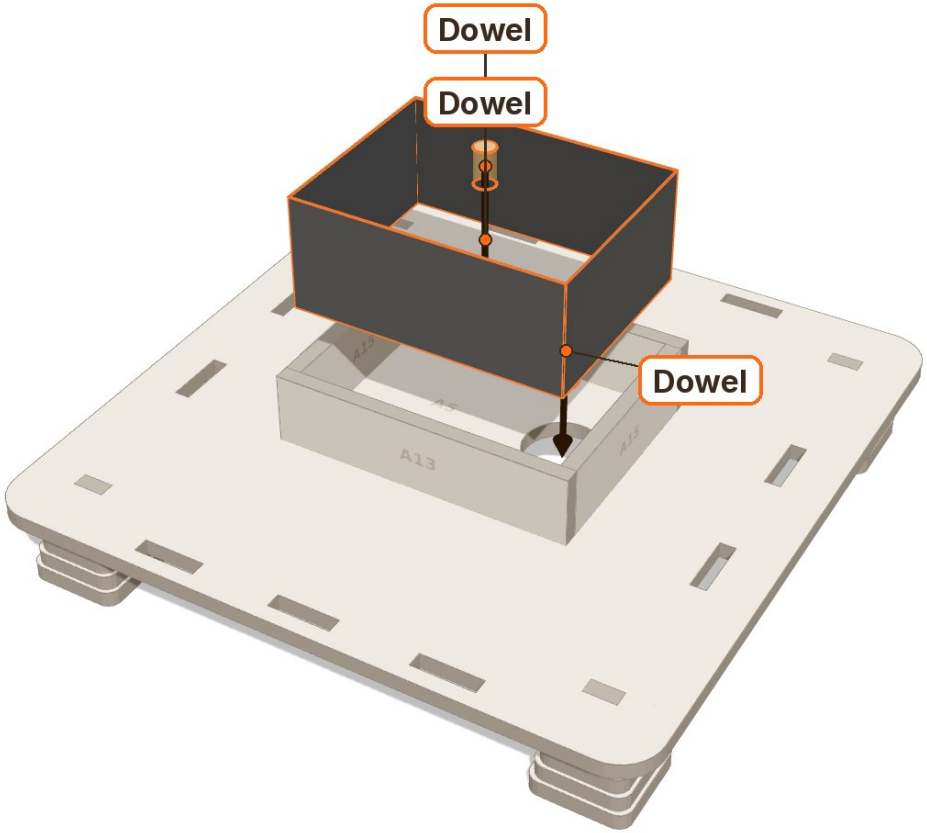

4 Drop in the music movement

See it in 3D

Dowel

Dowel

Dowel

Key side down. The key goes through the round hole.

TEST IT NOW
Wind the key two turns. You should hear music.

5 Build the drive coupler

See it in 3D

A10 x2

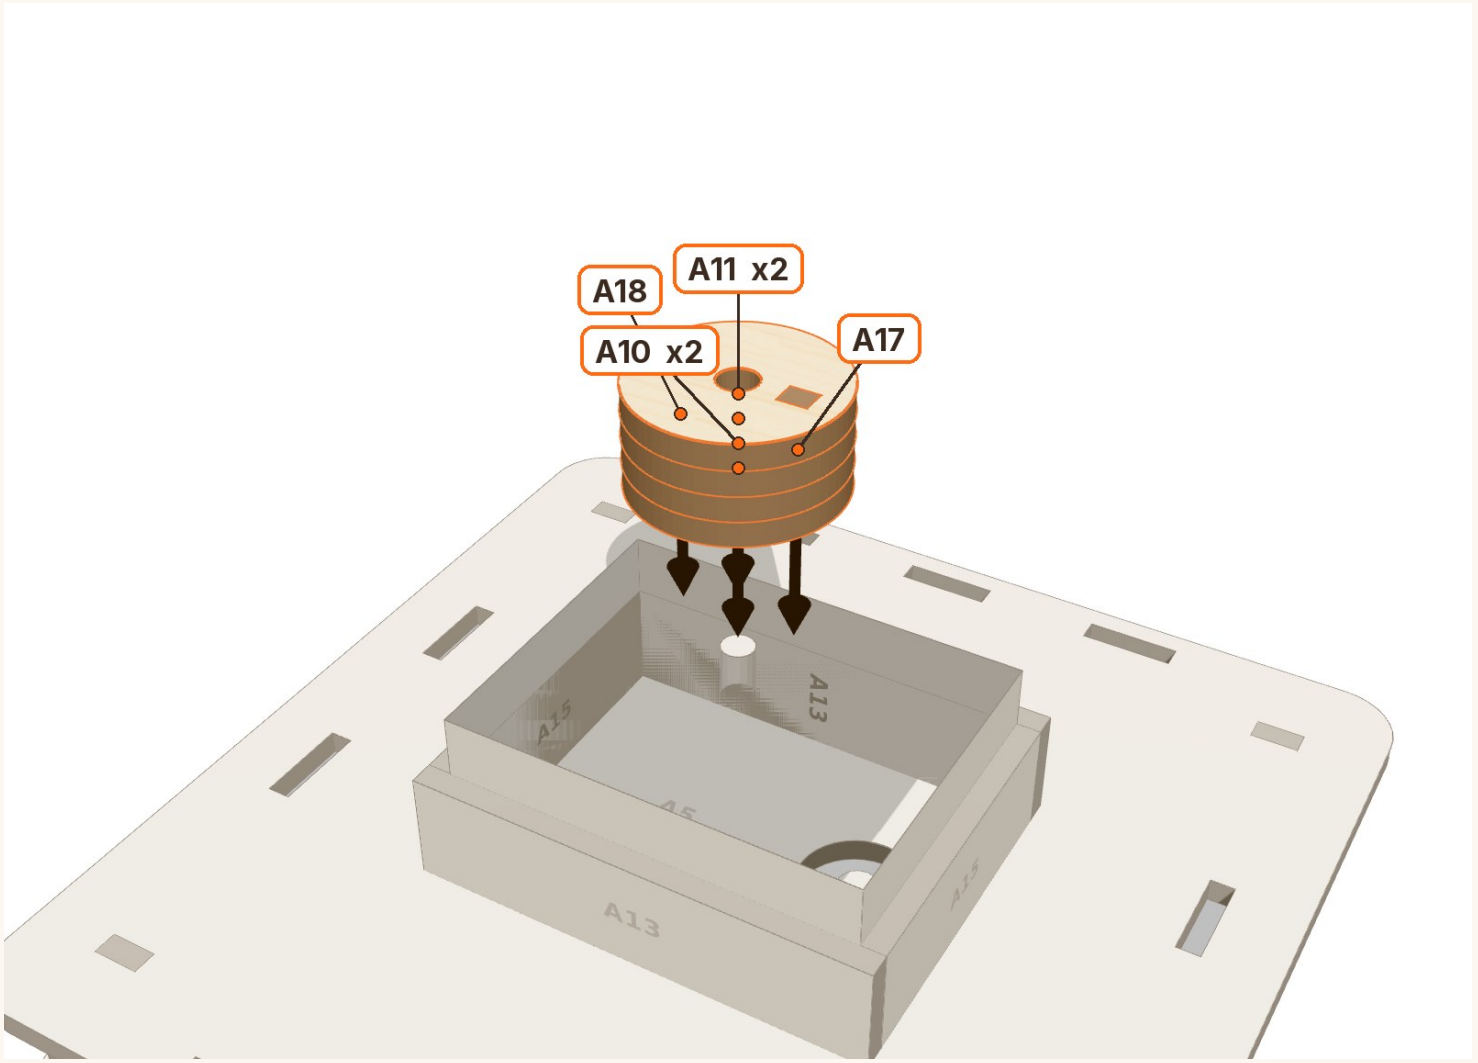

A11 x2

A17

A18

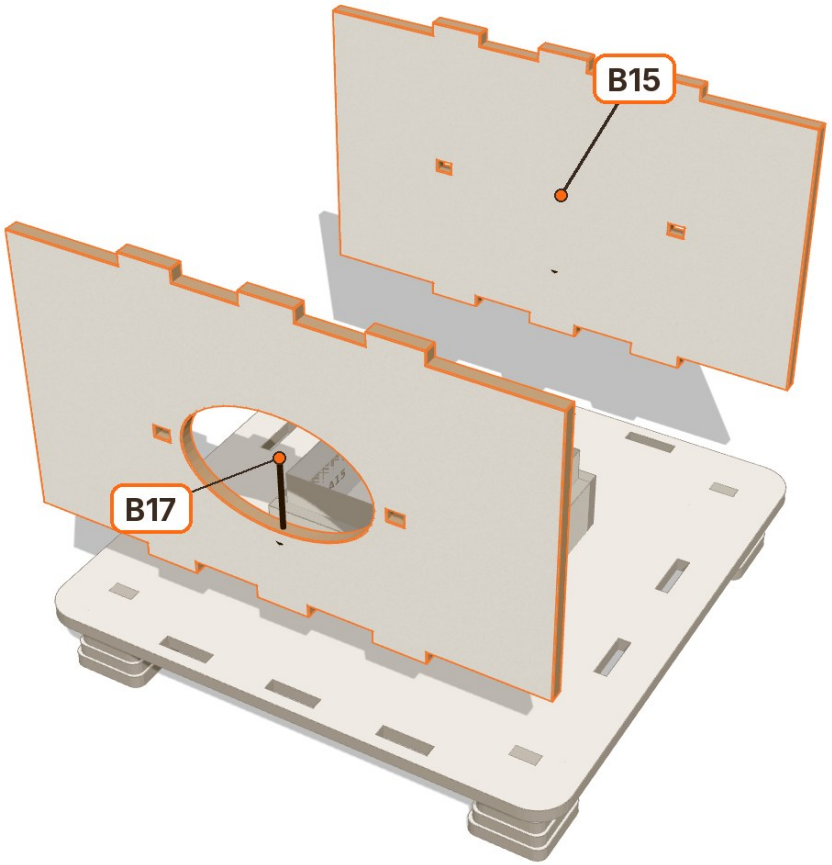

Two pegs lock the four discs together. Wax the top hole.

6 Stand up the front and back walls

See it in 3D

B15 B17

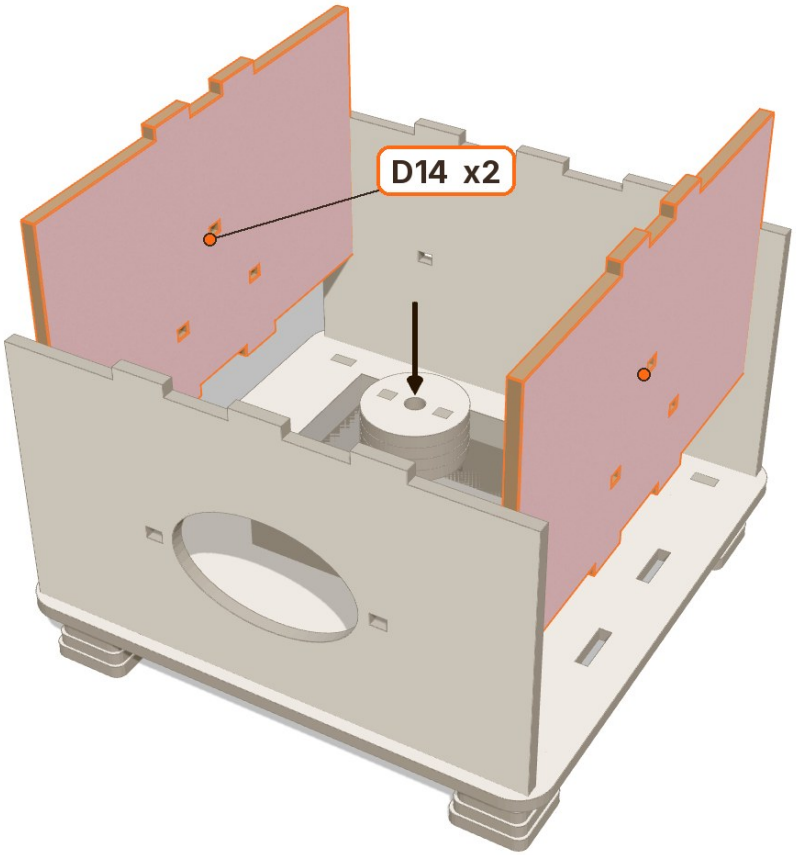

Window faces front.

7 Add the side walls

See it in 3D

D14 x2

Their tabs lock into the front and back walls.

8 Decorate the walls

E5 x2

F1 x2

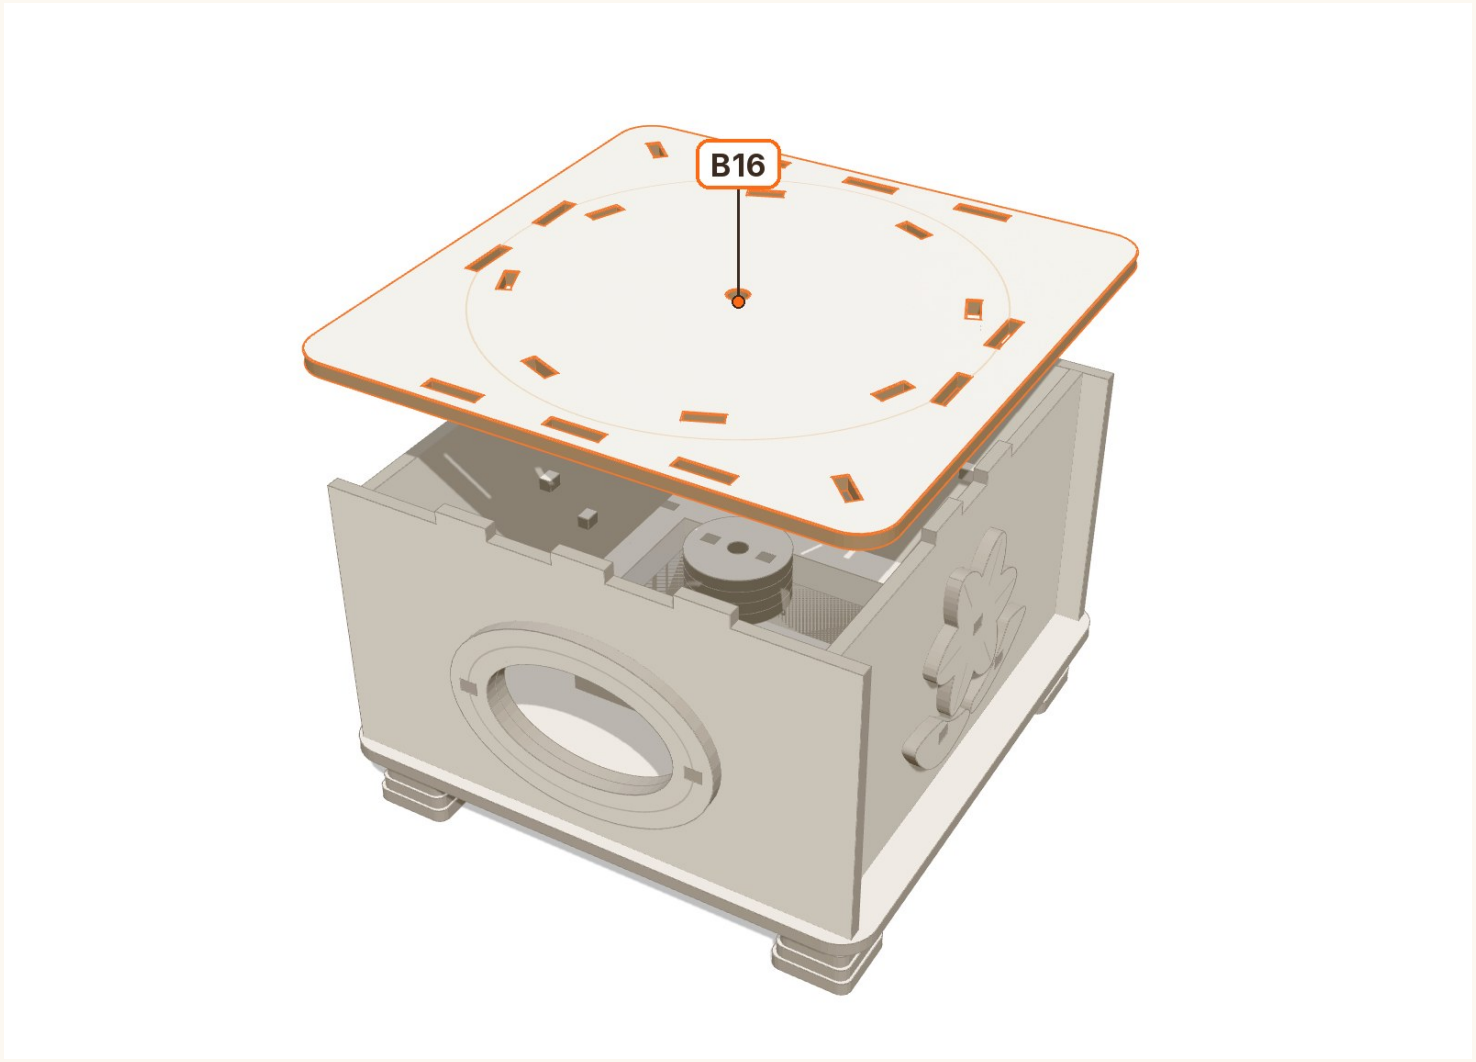

Each picture is held by little square pegs. Push from outside.

9 Close the box with the lid

See it in 3D

B16

Line up the round bearing hole with the coupler.

10 Fit the drive dowel and the turntable

See it in 3D

A9 x2

A12

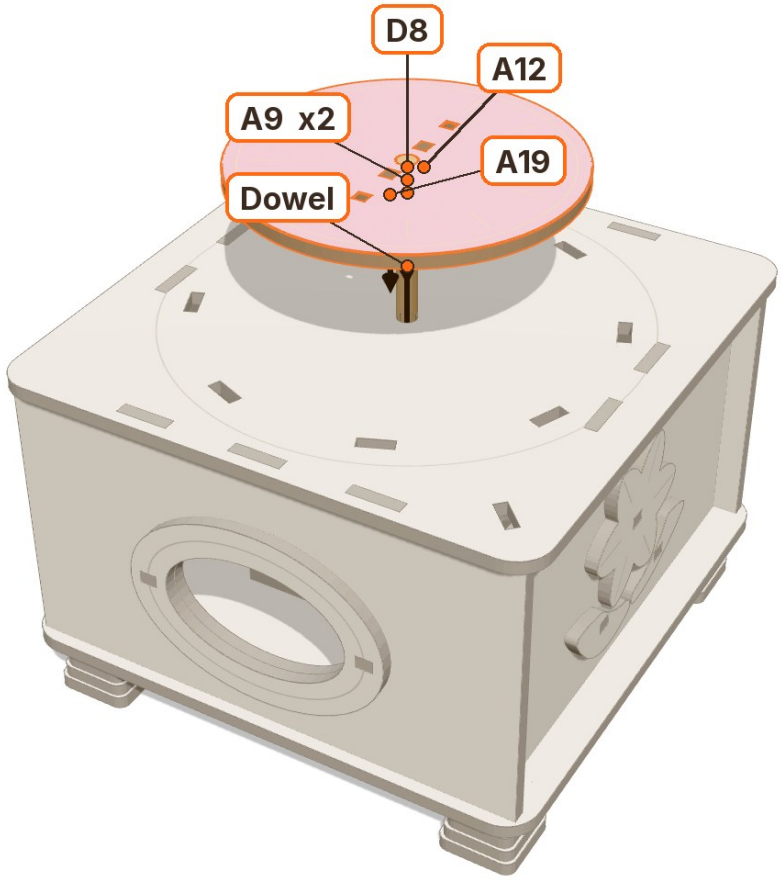

A19

D8

Dowel

Wax the dowel where it turns in the lid.

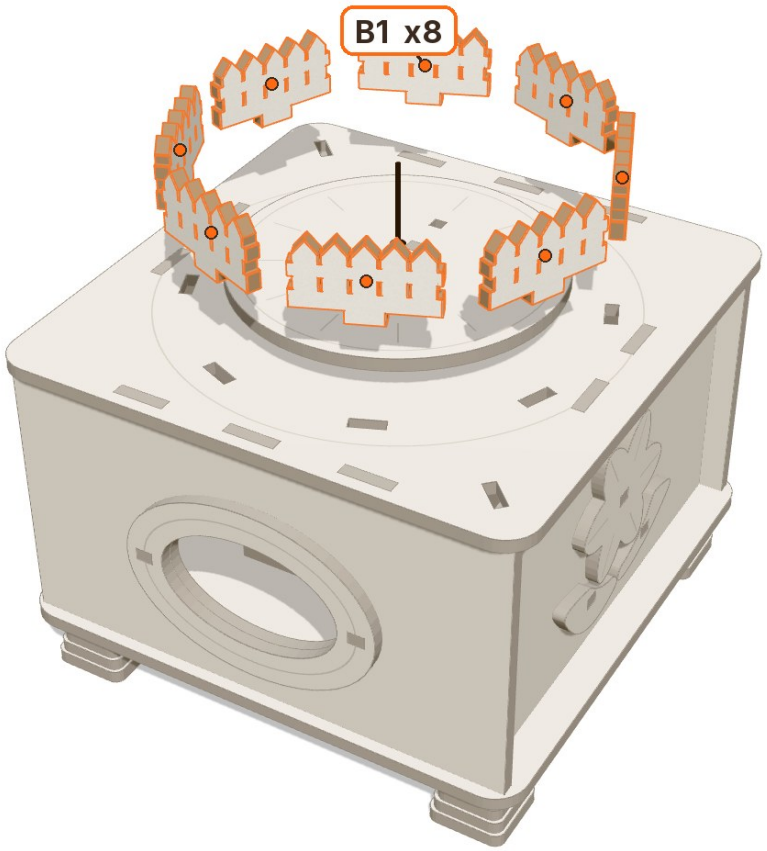

TEST IT NOW
Wind the movement. The turntable should spin smoothly.

11 Plant the garden fence

See it in 3D

B1 x8

x8

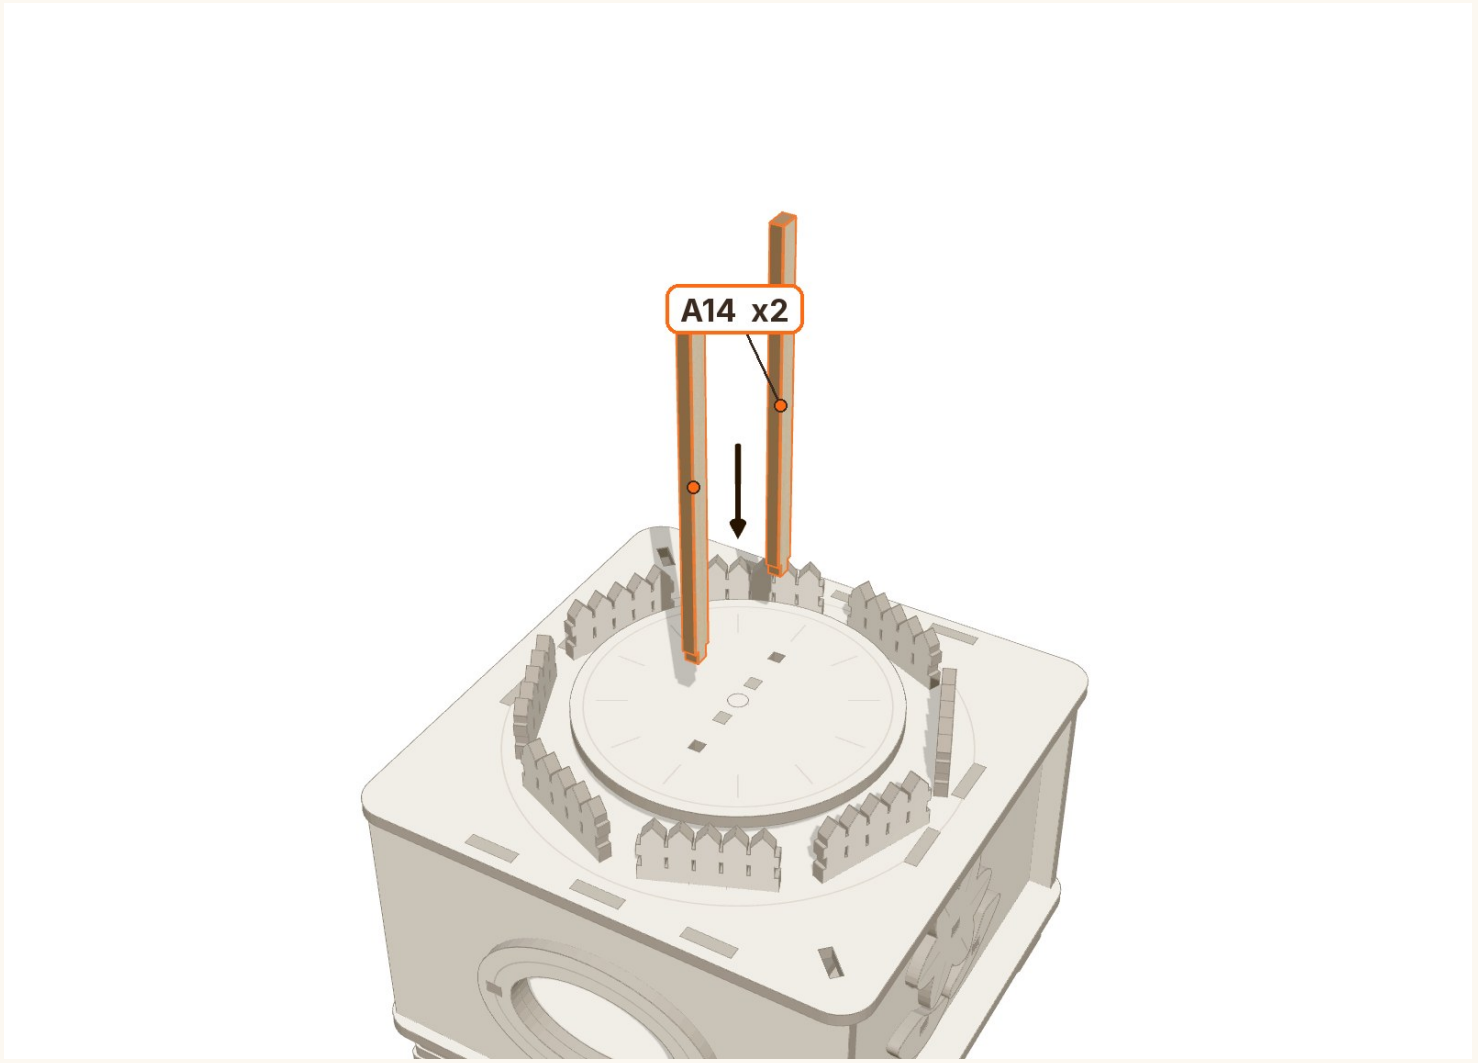

Eight fence pieces slot into the lid.

12 Stand the two vase keys in the turntable

See it in 3D

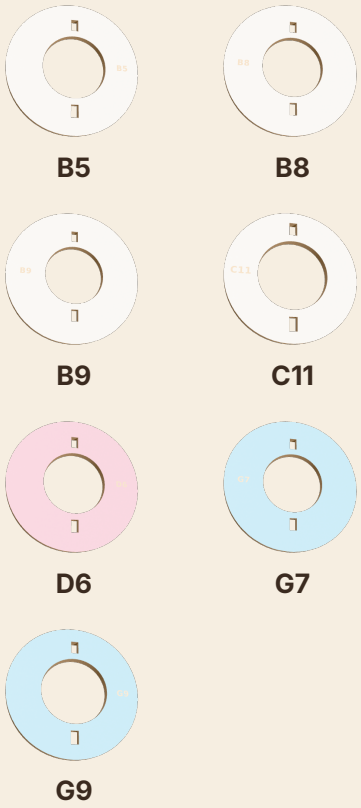

A14 x2

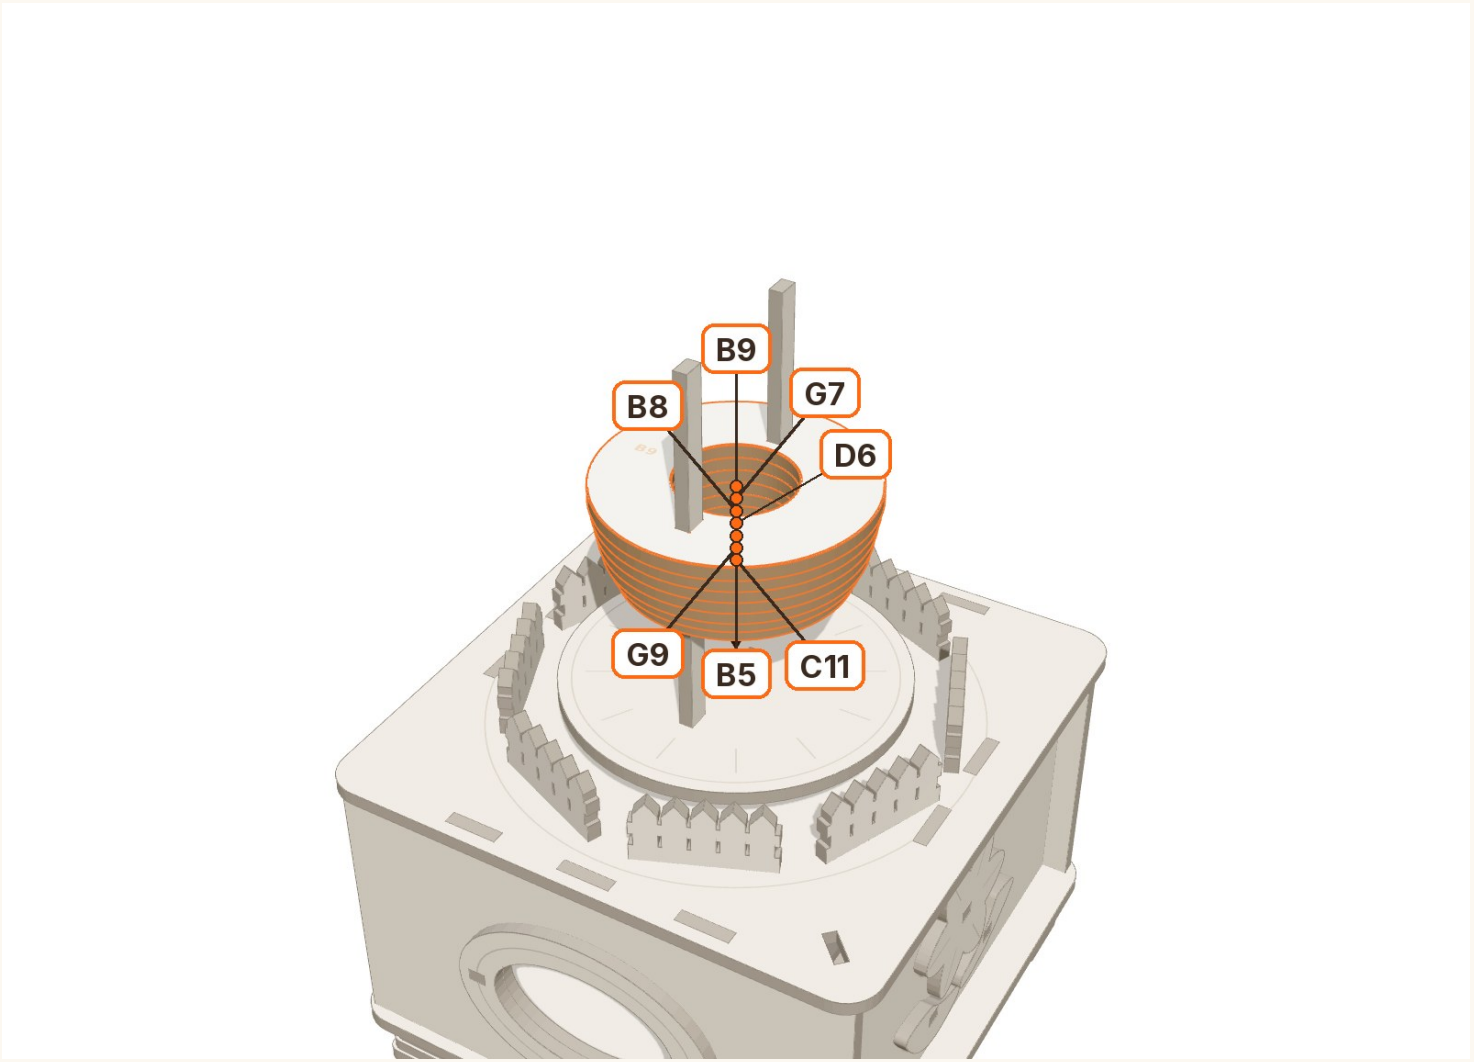

They are the backbone of the vase.

13 Stack vase rings 1 to 7

See it in 3D

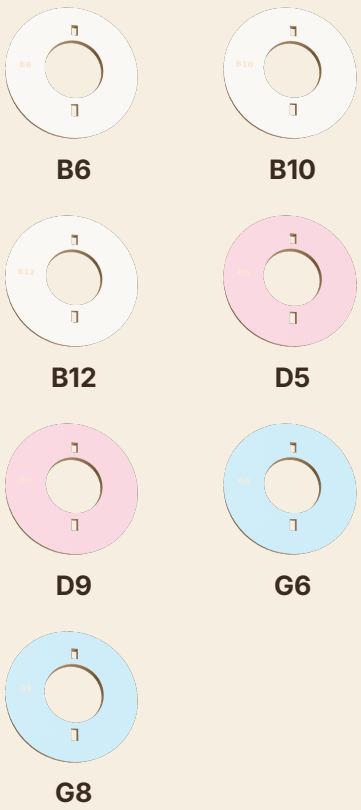

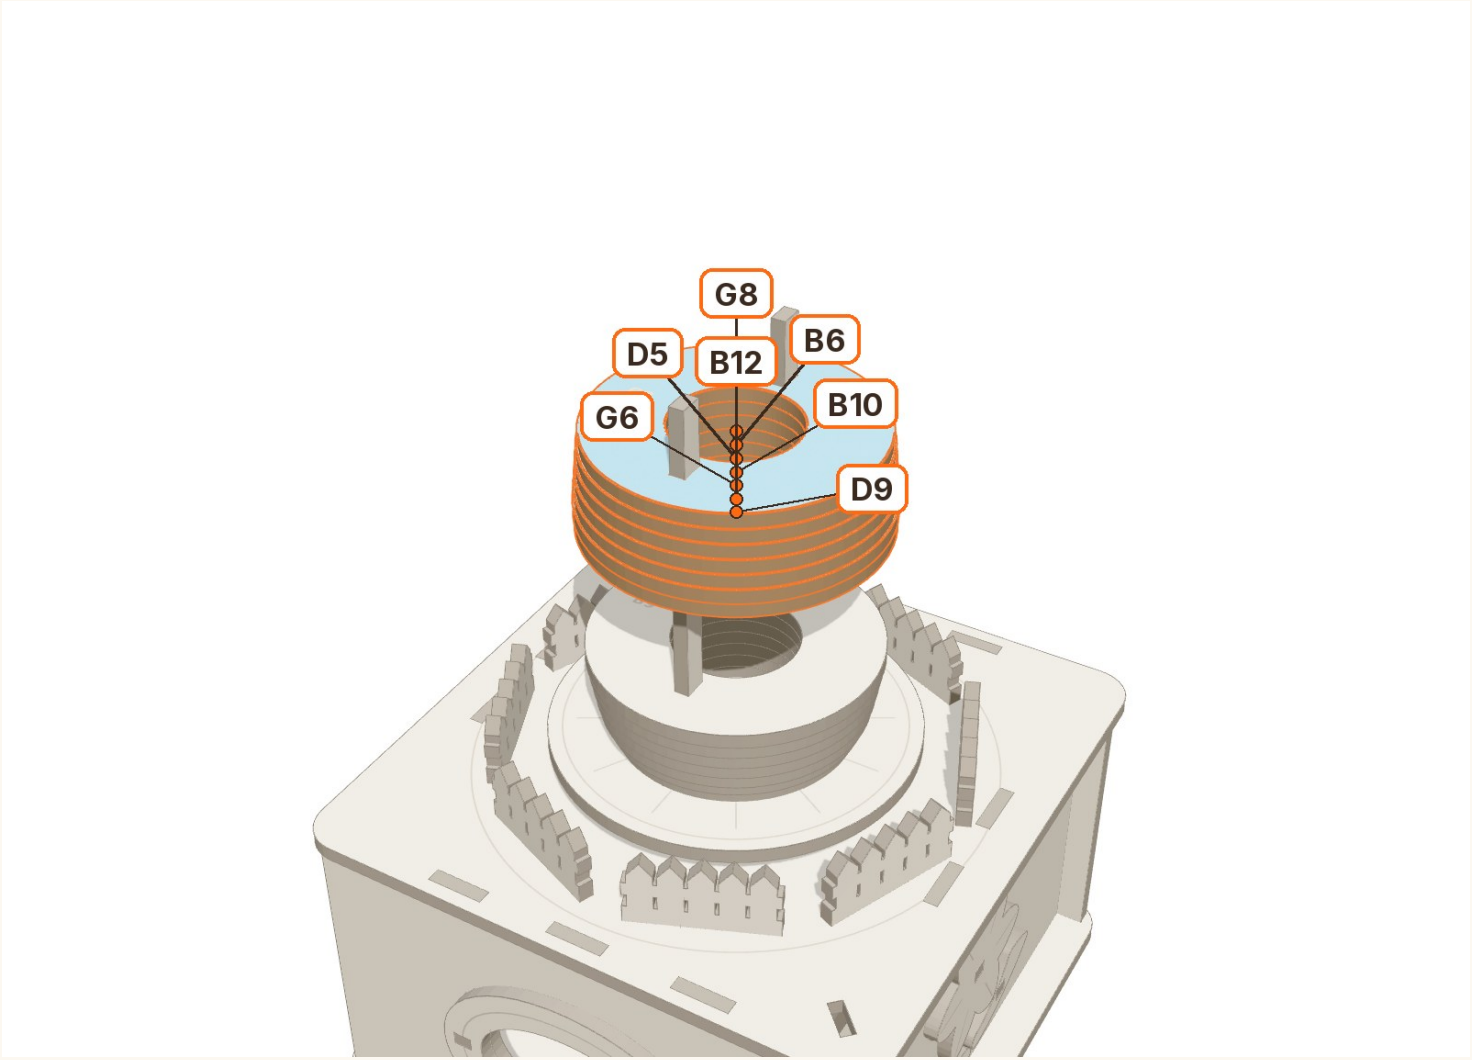

Slide each ring down both keys. Watch the colors.

14 Stack vase rings 8 to 14

See it in 3D

Slide each ring down both keys. Watch the colors.

15 Stack vase rings 15 to 21

H5

Push each body into the lid, then slide the wings down.

You built it!

Dust it with a soft dry brush. Keep it out of hot sun and damp rooms.

If a part works loose, press it back in. A tiny drop of wood glue is fine for repairs.

Missing or broken part? Send us the code from the parts map and we will mail a new one.
