SOP 4

Kitting and packing

When: Every kit **Time:** About 6 min per kit (Estimate, the same as the cost model) **Who:** Packer

You need: Planner tablet | Sheets per kit | Extras: bands, dowels, wax, sandpaper, movement | Small zip bags, mailer boxes, booklets, labels, scale

1

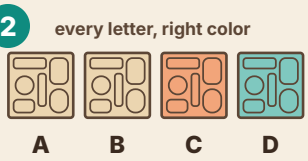

Open the kit card.

Planner, Tracking tab: tap the kit. The card lists sheet letters, colors and extras.

- Order number and kit name match the packing slip.

2

Take one of each sheet letter.

A half or quarter tile counts as one sheet. Look at both faces.

- Right colors, all letters, no cracked parts.

3

Fill the extras bag.

Use the extras list below. Dowels come pre-cut in batches on the stop-block jig.

- Count bands and dowels twice.

4

Pack: sheets, extras bag, booklet on top.

Largest sheets at the bottom. Kraft filler in the gaps so nothing slides.

- The lid closes flat without pressing on the sheets.

5

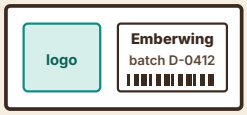

Weigh the packed box.

Write the first good box weight on the kit card. Later boxes should be within 5% (Estimate).

- More or less: something is missing or extra. Recount.

6

Label the box.

Lid label on top. Info label on the bottom: write the batch code in its box.

- The batch code matches the planner.

7

Move the kit to Packed in the planner.

Packing takes the extras out of stock. Buy the shipping label in your shop app.

- Inventory goes down. Reorder alerts show in red.

Extras list per kit (from `supply/bom_per_kit.csv`)

KIT	SHEETS	EXTRAS BAG
